

*"It's easy to get attached."*

IntelliQuilter is an after-market add-on for your long-arm and mid-arm quilting machines. IntelliQuilter is available for most makes of models of long-arm and mid-arm quilting machines. **IntelliQuilter can be added to a machine with or without existing stitch regulation.**

We offer in-home/studio installation as part of the price.

IntelliQuilter is installed on your machine with a minimal amount of modifications. Our **patented** motor control system

<b>Compatibility with The StiQ</b>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

- Prices include delivery (inside the continental US), installation, demonstration, training and warranty on parts and installation labor (currently without time limit). Customary travel expenses may be charged by installers.
- As a unique service from IntelliQuilter, the prices also include one year of continuing support by a dealer, providing not only technical assistance, but quilting advice, pattern design suggestions and more.
- Installation kits include mechanical parts that are required in order for the IntelliQuilter system to function at optimum performance on a given quilting machine. EdgeRider Wheels are required and sold as part of the installation kit for Gammill, APQS, HQ Sixteen and Innova quilting machines. EdgeRider Wheels can be purchased separately.
- **WARRANTY:** The manufacturer warrants the components of the system free of any manufacturing defects, including parts and labor, as long as they are in production, except the tablet computer that carries the manufacturer's one (1) year warranty. In addition, the installer warrants the installed system free of defects caused by the installation procedure for one (1) year. For the duration of the warranty period parts will be exchanged or repaired and installation repairs will be performed at no charge to the customer, including shipping and travel costs. Any and all defects are subject of investigation of the actual case of the malfunction to exclude defects caused by improper handling or use of the system.
